Document cited in the International Search Report:
D3: WO 0172055 A2

The cited document represents the general state of the art.
The invention defined in claims 1-18 is not disclosed by this document.

The first entity being a registrar and the second entity a presence server. The benefits of separating the two entities and have them operate independently of each other results in better integration with overall network in which they operate leading to a decrease in the overall load in the network. A subscription of events using the SIP protocol is also incorporated by the invention.
